 the letters of the '[]' class we will see that we articulate '[]' and by it indicate that they are in a conjunct together. The presence and absence of this
 matra can be important. doi:10.2307/410622. While different standards for romanisation have been proposed for Bengali, they have not been adopted with the degree of uniformity seen in languages such as Japanese or Sanskrit.[nb 2] The Bengali alphabet has often been included with the group of Brahmic scripts for romanisation in which the true
 phonetic value of Bengali is never represented. (Learn how and when to remove these template messages) This article includes a list of general references, but it lacks sufficient corresponding inline citations. ^ /v/ is the original pronunciation of the vowel [], though a secondary pronunciation /o/ entered the Bengali phonology by Sanskrit influence.
  Even though the near-open front unrounded vowel /æ/ is one of the seven main vowel sounds in the standard Bengali language, no distinct vowel symbol has been allotted for it in the script was conceived. scriptsource.org. Retrieved 20 November 2006. Abbreviated
 forms Some consonants are abbreviated when appearing in conjuncts and lose part of their basic shape. yet it is to be noted as a fact, that the cerebral letters are not so much cerebral as they are dental in our speech. As the last member of a conjunct, [] bô can hang on the vertical line under the preceding consonants, taking the shape of [] bô
 case, which makes it a unicameral script, as opposed to a bicameral one like the Latin script. There is no simple way of telling which symbol should be used. Journal of the International Phonetic Association. Clusters of up to four consonants can be orthographically represented as a typographic ligature called a consonant conjunct (Bengali:

This article contains phonetic transcriptions in the International Phonetic Alphabet (IPA). Punctuation marks Bengali punctuation marks, apart from the downstroke
 the Bengali equivalent of a full stop, have been adopted from western scripts and their usage is similar: Commas, semicolons, colons, quotation marks, etc. Thus, as conjuncts often represent (combinations of) sounds that cannot be easily understood from the components, the following descriptions are concerned only with the construction of the
 conjunct, and not the resulting pronunciation. ISBN 8120614526. A Palatal letters phonetically represent palato-alveolar sounds but in Eastern dialects they mostly are depalatalised or depalatalised and deaffricated. Most speakers colloquially pronounce /r/ as a flap [r], although the trill [r] may occur word-initially; with the flap [r] occurring medially
 | ghrô | prô, etc. Cambridge University Press. - - | sometimes be found. However, these files are Printable for home or tuition with apical alveolar consonants, the /s/, sound can sometimes be found. However, these files are Printable for home or tuition
 Wikipedia's multilingual support templates may also be used. To denote the absence of the inherent vowel [2] following a consonant, a diacritic called the []] hôsôntô ([]) may be written underneath the consonant. ^ "Annex-F: Roman Script Transliteration" (PDF). They are endowed with reason and conscience. ^ The original sound for [] was /ŋɔ/
 but in modern Bengali it is almost always pronounced /nɔ/, the same as \square. English & Bengali Online Dictionary & Grammar learn it, talk it "I was reading the dictionary. Theoretically, four-consonant conjuncts can also be created, as in \square rô + \square sô + \square rô = \square\square\square\square\square\square\square\square rstrô, but they are not found in native words. This is especially true in the
  parlance of western and southern part of Bengal but lesser on the dialects of the eastern side of the Padma River. Although still named murdhônyô when they are being taught, retroflex consonants do not exist in Bengali and are instead fronted to their postalveolar and alveolar equivalents. [9] The voiceless palato-alveolar sibilant phoneme /ʃ/ can be
  written as [], ([][][][] [] talôbyô shô, "palatal shô"), [] ([][][][][] [] murdhônyô shô, "retroflex shô"), or [] ([][][][] [] Although [] represents the
 aspirated form of the voiceless bilabial stop /p¹o/ it is pronounced either voiceless labial fricative /fo/ in Castern dialects) or voiceless labial fricative /fo/ in condinary speech. Part of a poem written by Nobel Laureate Rabindranath Tagore in 1926 in Hungary. Indian Epigraphy: A Guide to the Study of Inscriptions in Sanskrit, Prakrit, and the
 Other Indo-Aryan Languages. Exceptions When followed by 🛘 rô or 🖂 tô, 🖂 kô takes on the same form as 🖂 tô would with the addition of a curl to the right. A:; Chowdhury, Munier (1960). For example, since the consonant phoneme /n/ is written as both
 and [], the letters are not called simply nô; instead, they are called [][[][[] [] shôrô ô, "vocalic ô") /ɔ/ sounds as the default inherent vowel for the entire Bengali script. (Some graphemes may appear in a form other than the mentioned form due to the font used) Fused
  language in the Latin script. In Bengali, it developed two allophones: voiced palato-alveolar affricate /dʒɔ/ same as 🛘 when used at the beginning of a word and the palatal approximant in other cases. There are various ways of Romanization systems of Bengali, created in recent years but failed to represent the true Bengali phonetic sound. When a
  vowel sound follows a consonant (or a consonant cluster), it is written with a diacritic which, depending on the vowel, can appear above, below, before or after the consonant. Early Years/Preschool/EY (EYFS) activities/resources/displays. This creates confusion among inexperienced writers of Bengali. 🛘 u When following 🗸 rô, and in many fonts also
 following the variant [ [ ] rôphôla, it appears as a downstroke to the right of the preceding consonant as opposed to a downward hook below: [ ] rū [ ] prū [ ] bhrū [ ] prū [ ] bhrū [ ] prū [ ] prū [ ] bhrū [ ] prū [ ] prū

 ţô, 🛮 is reduced to a leftward curl: 🗓 tộo. As the first member of a conjunct, 🖺 nô can lose its bottom half: 🗓 nốchô 🗓 nốchô 🗓 nốchô nhỏc. Graphemes within a word are also evenly spaced, but that spacing is much narrower than the spacing between words. Please help improve this section by adding citations to reliable sources. While efforts at
 standardising the alphabet for the Bengali language continue in such notable centres as the Bangla Academy at Dhaka (Bangladesh) and the Pôshchimbônggô Bangla Akademi at Kolkata (West Bengal, India), it is still not quite uniform yet, as many people continue to use various archaic forms of letters, resulting in concurrent forms for the same
 sounds. In the native Bengali words, syllable-final \Box to /t̪o/ is pronounced /t̪/, as in \Box\Box\Box\Box\Box /nat̪ni/ "grand-daughter", \Box\Box\Box\Box /ksrat̪/ "saw", etc. \uparrow [\uparrow] only occurs in the individual pronounced of the letter \Box\Box [\uparrow<sup>6</sup>] but is usually pronounced as [\uparrow] in ordinary speech. Bengali, Assamese and Odia which are Eastern languages have this value for the inherent
 vowel, while other languages using Brahmic scripts have a for their inherent vowel. Yet in ordinary speech these letters are pronounced the same as [] in modern Bengali numerals Main article: Bengali numerals The Bengal
 matter of fact, there are two types of worksheet for kids in Kindergarten (Nursery, L.KG., U.KG.,) class students. p. 23. These vowel marks cannot appear without a consonant and are called [ ] kar. In a typical Bengali text, orthographic words, words as they are written, can be seen as being separated from each other by an even spacing
